(PROCEEDINGS held in open court before The Honorable Joel
 1
 2
    Schneider, United States Magistrate Judge, at 11:07 a.m.)
 3
             THE COURT: Counsel, we are on the record in In Re:
    Valsartan, Docket Number 2875.
 4
             We have a court reporter here so if you're going to
 5
    speak, please say your name, so the court reporter can
 6
 7
    appropriately identify you.
 8
             Why don't we just start with getting the names of the
 9
   people on the phone. Start with the plaintiffs.
10
             MR. SLATER: Good morning, your Honor. Adam Slater
   for plaintiffs.
11
12
             MR. HONIK: Ruben Honik for plaintiff.
13
             MR. PAREKH: Behram Parekh for plaintiff.
             MS. WHITELEY: Conlee Whiteley for plaintiff.
14
15
             MR. STANOCH: David Stanoch for plaintiff.
16
             THE COURT: Okay. Let's go to the defendants.
17
             MR. GOLDBERG: Seth Goldberg for ZHP and the
   defendants.
18
             MS. LOCKARD: Victoria Lockard for Teva and the
19
   defendants.
20
             MR. RUBENSTEIN: Brian Rubenstein for Teva and the
21
22
   defendants.
23
             THE COURT: Is there anyone else on the phone who
24
   hasn't said their name?
25
             MR. STOY: This is Frank Stoy for Mylan and the
```

```
defendants; and Clem Trischler is also on the line.
 1
 2
             MR. BLANTON: Robert Blanton for Hetero, U.S.A.
 3
             THE COURT: Anyone else?
             MR. KAPLAN: This is Andrew Kaplan for Cardinal
 4
 5
    Health Major Pharmaceuticals and the Harbor Drug Group.
 6
             MR. GEOPPINGER: Jeffrey Geoppinger for
 7
   AmerisourceBergen.
 8
             MS. NORRIS: This is Ellie Norris for McKesson.
 9
             THE COURT: Okay. Let's get to what we're here for.
10
             One, I commend the parties for the substantial
11
   progress they made.
12
             I'm aware of several issues that involve ZHP. Let's
13
   put those aside for the moment, and I'd like to start by just
    dealing with and confirming where we don't have any disputes.
14
             I'm going to read for the record what I think are the
15
    exhibits where there is no dispute, and I would just like to
16
17
    get confirmation from the parties.
             It appears to the Court that there is no dispute
18
    regarding the following exhibits that are attached to
19
   Mr. Slater's December 17, 2019, letter, Docket Number 324:
20
    Exhibit B, the ZHP custodians; Exhibit C, the Mylan
21
22
    custodians; Exhibit D, the Teva custodians; Exhibit E, the
    Hetero USA custodians; Exhibit F, the Aurolife and Aurobindo
23
24
   USA custodians; and Exhibit G, the Torrent custodians. Am I
25
    correct that there are no objections to those exhibits?
```

```
MR. SLATER: Your Honor, Adam Slater.
 1
 2
             I think there is an objection to one custodian on the
 3
    ZHP list, Exhibit B. And I think there is no objection and no
    dispute as to Exhibit H, the search terms.
             THE COURT: Is that correct?
 5
 6
             MR. GOLDBERG: Yes, your Honor. This is Seth
 7
   Goldberg on behalf of ZHP.
 8
             We do have one objection -- or an objection to one of
 9
    the custodians on the ZHP list, but, other than that, we have
   no objection to the custodians, and I think Mr. Slater is
10
    correct about the other custodian lists and the search terms.
11
12
             THE COURT: We will add Exhibit H to the list of
13
    agreed upon exhibits. Exhibit H is the search terms.
14
             Let's talk about Exhibit B then and address the
15
    objection that is made.
16
             Mr. Goldberg, the Court will hear you.
17
             MR. GOLDBERG: Thank you, your Honor.
             And I don't know if you've had a chance, but I did
18
19
    send you an e-mail about an hour ago on this.
20
             THE COURT: I did see it and I did read it.
21
             MR. GOLDBERG:
                            Okay.
22
             THE COURT: What's the gentleman's name again?
23
             MR. GOLDBERG: The gentleman's name is Baohua Chen.
24
   He is the highest ranking official at ZHP. He is --
             THE COURT: Where is he on Exhibit B?
25
```

```
MR. GOLDBERG: I have to --
 1
 2
             THE COURT: Oh, last page, third one down? The third
 3
   page --
             MR. GOLDBERG: Yes, yes.
 4
             THE COURT: B-A-O-H-U-A Chen, C-H-E-N.
 5
 6
             MR. GOLDBERG: Correct.
 7
             THE COURT: Okay. Let's hear it.
 8
             MR. GOLDBERG: And if you recall the org charts,
 9
   Mr. Chen is at the highest box on the org charts. He's the
   highest ranking official at ZHP. He is not involved in any of
10
    the manufacturing, testing, regulatory, quality affairs,
11
    quality assurance, quality control functions at the company,
12
13
    and Mr. Du explained that when he met with your Honor and
   plaintiffs in October. He is, in addition to being the
14
15
   president of the company, he's also chairman of the company's
16
   board.
17
             Mr. Du, who the Court has ordered to be a custodian,
    is the second highest ranking official at ZHP. He's the vice
18
19
   president. He is also the vice chairman of the board. And,
20
    in our view, the production -- the custodial file of Mr. Chen
21
    is not necessary because of -- that it will be cumulative and
22
    duplicative with that of Mr. Du.
23
             But, more importantly, perhaps, is the fact that, as
24
   we previously discussed, information that's going to be
25
   produced by ZHP to the U.S. has to undergo a State secret
```

```
review, and there are going to be various categories of information that are going to be subject to the State secrets, and we'll learn that as we collect the documents.
```

But one thing is clear about Mr. Chen that is different than all of the other custodians, is that he is an official in the Chinese government, and he serves on various committees for the Chinese government. We have provided some of that information to you that was readily available to us, identified to us by our client just yesterday. And once we learned this, we promptly communicated that to Mr. Slater and plaintiffs' counsel.

But you can see on this document that I sent you, he is currently a member of the Tenth Zhejiang Provincial

Committee, a member of the Third Standing Committee of the

Chizhou Municipal People's Congress, and a member of the 14th

Standing Committee of the Linghai Municipal People's Congress.

What we understand is in his role as a government official, he obviously has communications in that role, and what we don't want to do is have an already exceedingly burdensome process with respect to the State secret review to be even more burdensome by having to work around Mr. Chen's role with the Chinese government, especially in light of the fact that plaintiffs are getting the second highest official of the company, the vice chairman of the board, and somebody who plaintiffs have, you know, made at least -- they claim to

```
have made a good-faith basis for Mr. Du because, as they say,
 1
   he's attended regulatory meetings, he's attended FDA
    inspections, and so, in addition to having board-related
    information and management-related information, Mr. Du will
 5
   have information pertinent to the facts at issue.
             Mr. Chen, at most, is going to have the
 6
   management-related communication and board communications
 7
 8
    about valsartan, if any, and those are going to be duplicative
 9
   with what Mr. Du has. And so, for those reasons, we think
   having Mr. Chen as a --
10
             DIGITAL VOICE: Is now in the conference.
11
12
             MR. GOLDBERG: -- as an ESI custodian is not
13
   warranted --
14
             DIGITAL VOICE: Has left the conference.
15
             MR. GOLDBERG: -- and will not provide meaningful,
16
    probative information that another witness or another
17
    custodian won't be able to provide.
             And, importantly, your Honor, we're not suggesting
18
    that your Honor not provide a substitute ESI custodian.
19
    just think the burden is not warranted for Mr. Chen.
20
             THE COURT: Mr. Slater?
21
22
             MR. SLATER: Thank you, your Honor.
23
             First of all, Mr. Chen's name appears in the core
24
    discovery documents. He was copied on them and is aware of
25
   what was happening. And it's our understanding from reading
```

```
that he would have been fully aware of everything and, thus, we would expect that he was involved in decision-making, number one.
```

Number two, counsel's making a representation about duplicative documents when they haven't searched the documents yet. And I think that goes back to the case we discussed last week. They have never actually collected the documents or done a comparison to be able to say there is a duplication or that there aren't probative documents that would only appear in one or the other's custodial files, so it's completely speculative what they're telling you.

Number three, this entire -- really, what they're really saying is the State Secrets Doctrine somehow is going to make this burdensome for them. This is -- honestly, it's opened a new door to another massive macro issue in this litigation, and I'm very glad that it's now been uncovered and put in front of us. Because from the plaintiffs' perspective and I think from the perspective of the United States of America and regulation of drugs, that has absolutely no significance, and it should not be given any weight in these -- or any consideration on this objection.

If they're saying because he was -- whatever he was -- I don't know the meaning of what his positions were.

We all know many people we work with are the mayor or the

25

municipal prosecutor and they hold other jobs at other businesses, so I don't know if he's the mayor. I don't know what his -- the importance of it is, and it doesn't really matter. If the government chooses to have him have some role in the government, we now need to know -- first of all, that should never be a basis to hide any information from us. Number one, if it's relevant, we should get it anyway. If they're going to take the position that under Chinese law, we are not going to get probative information, that's a macro issue that we need to have thoroughly disclosed at this point in the litigation for both the benefit of the parties and the benefit of the Court, because if they, for example, are going to say there is some important information from some custodian's file that they're not going to produce, that could have a significant impact on what's going to happen in discovery and what we're going to know. I'm looking -- and coming back to the core discovery documents, I'm looking at documents that were produced, for example, a document from Baohua Chen dated September 24th, 2007, to the Drug Master File Staff at the FDA, and in that document, he's talking about valsartan active API and certifying certain information about it. I won't get into more detail, but I can represent to your Honor, he was the author of this letter on the drug master file to the FDA in 2007.

So, we have other documents I have in front of me, so I can make a good-faith representation that there are other documents.

I have another one going back to 2012, where information is being provided about his involvement with valsartan as a chemical engineer, one of his qualifications to have information about this.

So he's factually relevant to this case. What the top executive in the company knew, what that person was told, what that person did, is significant both to liability on the substantive claims and the punitive damages claims in this case. So, you know, the buck stops with him, and he's above Jun Du, and he had involvement with valsartan, so we would have a very strong factual basis to include him.

And, again, this idea that somehow Chinese law or State secrets is going to somehow impede discovery in this litigation is of enormous concern, and it's a side issue that's now been opened. Well, I think that ZHP needs to make a representation to the Court as to the extent to which they think that Chinese law, whether it's State secrets or anything else, is going to impede discovery, is going to impede our access to witnesses, is going to impede our ability to collect a judgment at the end of the litigation. I mean, this is very significant information that I think that we all need to get our arms around.

So, for all those reasons, we ask that Mr. Chen be maintained as a custodian, and I suppose at another time soon, maybe in the conference, we can start to talk about how Chinese law may impede our ability to vindicate our clients' rights in this litigation.

THE COURT: Let me jump in here, Mr. Goldberg. We'll hear from you, but let me just jump in here for a second.

Mr. Slater, I think you're raising an issue about the State secret that we've touched on previously in the case, although we haven't gotten into it in detail. It is an enormous issue. I don't think there is any question about that. But I think it's premature to deal with the issue now.

What I would envision is that we would handle -- if there is a State secret issue, we would handle the issue akin to how we would handle privileged documents.

If there are relevant documents that are responsive to the document requests that come up in the hits with custodians and the search terms, and if ZHP feels that its hands are tied and it can't produce those documents because of Chinese State Secrecy Law, I would assume that ZHP would identify those documents akin to a privilege log, and then it would be appropriate to deal with the State Secret Law. But I don't know how we can deal with this State Secret Law without knowing, one, whether there are any responsive documents that are going to be withheld on that basis; and, two, generally,

```
what those documents are.
 1
 2
             MR. GOLDBERG: Your Honor --
 3
             THE COURT: Mr. Goldberg, were your thoughts any
 4
   different?
 5
             MR. GOLDBERG: No. And, in fact, I think what you
    are getting at is exactly why, one, Mr. Chen is really not a
 6
 7
   proper custodian; and, two, how this issue is going to be
 8
    dealt with in a way that we're trying -- you know, the
 9
    challenge here is we expect -- given the production of
    information we've already made, given the kind of information
10
    the FDA is able to review and obtain, we know that, you
11
    know -- I mean, we expect at least that quantities of
12
13
    information are not subject to the State secret review.
    know, these core -- core discovery documents, for instance,
14
    all of these communications, the manufacturing documents.
15
16
             We -- what our concern is -- and so, what we hope to
   be able to do is to have a privilege-log-type document, and,
17
    hopefully, it doesn't have a huge volume of information on it.
18
19
   We don't expect it to, given the issues in this case.
             Mr. Chen is uniquely different because it's not his
20
    relevant information, if any; it's the vast quantities of --
21
22
   potentially vast quantities of actual government-related
    documents in his custodial file that had nothing to do with
23
24
    this case. That would be a burden for us to have to translate
25
    and review, to determine that they are State secrets because
```

```
they're -- you know, they really relate to his role with the government in a non-valsartan-related way.
```

THE COURT: But, Mr. Goldberg, to butt in here, in theory, wasn't the purpose of identifying the search terms so that the parties would avoid getting hits on irrelevant documents? So, if there is a purely political document that has nothing to do with valsartan, in theory, it wouldn't show up on any of the searchs that are done for the documents. In theory, isn't the case that the only documents that would have to be reviewed would be those that are responsive to the search terms which are designed to identify relevant documents?

MR. GOLDBERG: I don't disagree with you that, in theory, that is correct.

I think the parties have chosen a very broad set of search terms, over 400 of them, some of which are generic terms, and the challenge here is that we're not just dealing with looking at the documents. There is a cost to having to translate them to determine, if a false positive is not related to the case, that's one thing; if a false positive is a State secret, we have to make sure of that. So, for ZHP, the burden is quite different than other defendants because even to make that determination, we need to spend the money and the time to translate the document.

And so I think, with respect to Mr. Chen, given his

```
role at the company and given Mr. Du as an ESI custodian, it
 1
 2
    seems that there is only marginal, if any, relevance or need
    to have Mr. Chen as a custodian.
             THE COURT: Let me ask you this question,
 4
 5
   Mr. Goldberg, and this really gets to the crux of it. If we
   had assurances that whatever information would come up in the
 7
    search of Mr. Chen is duplicative of what would come up in
 8
    other searches, then the Court's decision would be easy.
             Mr. Slater cited a specific document, this letter, I
 9
    forgot the date, that he apparently authored about the DMF to
10
    the FDA. So let's talk about that letter. Is that letter --
11
   hold on, hold on.
12
13
             MR. SLATER: Judge --
14
             MR. GOLDBERG: Your Honor --
15
             THE COURT: Hold on.
16
             (Simultaneous indiscernible colloquy by counsel.)
             MR. GOLDBERG: Your Honor, let's talk about this
17
18
    letter, because as Mr. Du explained --
19
             MR. SLATER: I'm sorry, Mr. Goldberg. Can I just --
20
    I think it will help the call. I'm sorry.
             I just need to read one paragraph from the letter.
21
22
    think it will -- it's dispositive, I think.
23
             This is the September 24th, 2007, letter from
   Mr. Chen to the Drug Master File Staff of the FDA which
24
25
    states, in part -- and I'm quoting from the letter, and I
```

```
can't pronounce it well yet, give me another few years, but:
 1
 2
    Zhejiang Huahai hereby certifies that valsartan API product
    supplied under this DMF will be manufactured in accordance
    with the methods described within, and any changes to be made
    in the described methods will be communicated to any users of
    this product, as well as to FDA, via filing updates.
 7
   hereby authorize the FDA for any inspection of our valsartan
 8
   API manufacturing facility by its inspectors." And that's him
 9
   writing it in 2007. I apologize for interrupting, but I
    thought this paragraph of the letter would be helpful to the
10
11
    argument.
12
             THE COURT: Mr. Slater --
13
             MR. GOLDBERG: Your Honor --
14
             THE COURT: Hold on one --
15
             MR. GOLDBERG: Your Honor, this document -- sorry, go
16
    ahead.
17
             THE COURT: I was just going to ask, what was
   Mr. Chen's position when he wrote that document?
18
19
             MR. SLATER: It says, General Manager -- it says,
20
    General Manager, ZHP Limited. So, apparently, he carried
21
   multiple titles over the years.
22
             THE COURT: So --
23
             MR. GOLDBERG:
                           Whatever that title was, it is --
24
             (Simultaneous indiscernible colloquy by counsel.)
25
             MR. GOLDBERG: Whatever that title was, it is the

functional equivalent of the president title that he holds
      That document is completely irrelevant to any of the
manufacturing-related issues here. He certified a letter.
                                                           Не
didn't author the letter.
         (Simultaneous indiscernible colloquy by counsel.)
         MR. GOLDBERG: -- is required to be made of the
management of every pharmaceutical company. It's like a CFO
certifying an SEC filing or any other kind of government
filing. It doesn't suggest that Mr. Chen has any involvement
with any of the manufacturing, testing, quality control,
quality assurance, or regulatory facts at issue. And, in
fact, that document predates the relevant time period.
         There is nothing produced with respect to the
current -- the current manufacturing process, the regulatory
issues, relating to the recall, any of the testing.
         And Mr. Du, your Honor, explained that to plaintiffs
in court, and he explained that Mr. Chen has no involvement in
any of this. It's a stretch to think that Mr. Du does, and --
simply because he's been on these documents, but he has been
at the inspections. He has been involved in the inspections.
That's apparent. But plaintiffs have not made -- the simple
fact, as your Honor said, some involvement in valsartan is not
the standard. Your Honor said that last week. At most, a
letter signing -- signing a foreign letter is some
involvement.
```

```
1
             THE COURT: Here is my question.
 2
             MR. GOLDBERG: That's at most.
 3
             THE COURT: Here's my question, Mr. Goldberg. This
    is the crux of it. The first part of what I said had to do
 4
   with the privilege issue. It just seems to me that what the
    Court said is really not debatable. It's an issue. The State
 7
    secret concern is an issue. If ZHP withholds relevant
 8
    responsive documents on the basis of State secret, those
 9
    documents or documents have to somehow be identified on
    something akin to a privilege log, and then we can decide the
10
    issue.
11
12
             The Court is unable to decide whether or not the
13
   privilege protects documents without knowing, one, whether
    there is even an assertion of a State secrets privilege,
14
    that's what I'm calling it, or what the documents are.
15
16
             The second issue which I think really gets to the
    crux of this is: The key 2007 document that Mr. Slater is
17
    citing to, Mr. Chen signed it. Would that document be
18
   produced, identified --
19
20
             MR. GOLDBERG: Yes.
21
             THE COURT: -- if we take him off the --
22
             MR. GOLDBERG: It was produced. That document would
23
   have shown up in the search terms. It was produced because
    it's part of the regulatory file.
24
25
             Remember, Mr. Du's custodial file is going to be
```

```
produced. To the extent that Mr. Du, at the second highest
ranking management level in the company, received information
about any of the manufacturing processes at issue, that stuff
is going to be produced. All of the valsartan information is
going to be produced.
         I mean, the idea that Mr. Chen has received a
communication that no one else at the company has received
relating to valsartan or somehow wrote -- maybe his own
document, that no one else has seen, relating to valsartan,
that's what you're -- that's how you would weigh the burden.
The chance that Mr. Chen has a document that no one has seen
before that has to do with valsartan, in his role as the
highest ranking official, versus the burden of searching
through all of his documents, translating them, to ensure that
they don't contain State secrets about his role with the
Chinese government, in various roles.
         THE COURT: Mr. Slater, last word. Isn't that the
key question the Court has to consider: What is the
likelihood that something is going to be turned up with
Mr. Chen listed as a custodian that is not otherwise revealed
or produced, given the scope of the custodian list and the
search term list? What is that likelihood?
         MR. SLATER: The case that we talked about last
week -- I don't have it in front of me -- was very clear. All
the defense is saying is this is what we think is going to
```

```
They've never done what that case said you have to do
 1
   which is actually review the custodial file and be able to
 2
    tell the Court there is complete duplication. I'm not in
    their files. This person -- the fact that this document was
    in the core discovery -- I'm being presented with a moving
 5
    target, frankly.
 7
             I was asked why -- the start for Mr. Goldberg was he
 8
   had no involvement whatsoever. Let's remember where we
    started. This man had nothing to do with valsartan at all.
    So I had Chris Geddis running down the hall, pulling documents
10
    out of the core discovery, and running back into the room with
11
    these documents to show, yes, he had involvement. And this is
12
13
    not a form. It doesn't say he's certifying someone else's
    information. It's signed "sincerely" by him. So we
14
    established what Mr. Goldberg said we couldn't, that this
15
    person was involved with valsartan.
16
17
             Now he's saying, well, also, we think you're not
    going to get anything different from him, but we've never
18
    collected his documents, we've never compared his custodial
19
20
    file to anybody else.
21
             And, by the way, we have proofs we have to make,
    Judge. We have to take this as high as we can to prove
22
    punitive damages, and to prove the absolute liability.
23
24
             He's the person who represented to the FDA that the
25
    core issue in this case, that any changes would be
```

```
communicated to any users of the product, which we know did
 1
 2
   not occur. So he specifically represented to the United
    States of America Food and Drug Administration that something
    would happen that did not occur, and we don't believe that the
 4
    full scope of this was disclosed. I don't know what else is
 5
    in his file by way of notes, worksheets, meeting notes, of
 7
    committees that he may have sat on that other custodians may
 8
   not have sat on. We have no idea. But there is enough of a
 9
    good-faith basis, because, again, their objection was that
    this person did not -- here -- far removed from day to day,
10
    unlikely to have materially relevant documents. We have
11
   proven that that objection is unfounded. That was their
12
13
    objection. They have no basis to say they've compared
14
    custodial files.
15
             It is common, in every case I've ever been involved
    in, for the chief executives of the company to have their
16
17
    files searched so we can see what their involvement was, what
    instructions they gave, were they misled. We don't know any
18
19
    of those things, and we have to be able to make a case that
20
    right up to the very top of the company, there is liability.
21
             THE COURT: All right. The Court's prepared -- the
22
    Court's prepared to rule.
23
             DIGITAL VOICE: Is now in the conference.
24
             THE COURT: The Court is prepared to rule on the
25
    issue, and I'll explain the reasons for the Court's decision.
```

The Court's decision is that at this time, it is going to sustain Mr. Goldberg's objection and remove Mr. Chen as a custodian on the exhibit to be approved by the Court.

The reason for the Court's ruling is because it perceives the key issue to be asked is what is the likelihood that documents are going to be revealed in Mr. Chen's search that are not going to be revealed by all the other custodians and search terms?

We don't know, of course, to a certainty that

Mr. Chen does not have unique documents. We have to apply our

common sense and experience to reach a judgment on that issue.

The Court's common sense and experience on that issue tells me

that a person at the top of the food chain gets information

fed by other people to it, certainly, the number two person,

Mr. Du.

The Court just does not believe at this time, based on the present record, that a search of Mr. Chen's custodial files will add any material evidence or documents that are not otherwise going to be proven in the case.

With regard to the burden issue, quite frankly, that's not a big factor in the Court's decision. This case is enormous. The potential damage claim in this case is enormous.

On top of that, when the Court considers the burden to the parties, the Court takes into account the public

2

interest. There is tremendous public interest in this case. It has enormous public health consequences -- whether a very popular drug supplied in the United States was contaminated or not. Given the public interest and the health and welfare implications, when it comes to evaluating the burden to the defendant in the case, the Court has to take that into consideration. It's not just a simple matter of dollars and cents, but on this particular issue, it really isn't a dollar and cents issue as far as the Court's concerned. The Court's main concern is, again, whether or not, if we add this person to a pretty hefty custodian list, it's likely or probable that we're going to find something that is not otherwise going to be produced. I don't think that's the case. I could be proven wrong in the future. If there is evidence in that regard, so be it. But in terms of a custodian search for documents, the Court sustains Mr. Goldberg's objections and will remove Mr. Chen from the list, and will approve the list absent his name. I'll make it clear. The Court is not ruling at this time whether or not Mr. Chen is an appropriate deponent. That's a completely different evaluation that the Court has to consider at the relevant time. If defendant wants to depose Mr. Chen, we'll deal with the issue at that point. But in no

way, shape, or form should the Court's ruling as to whether or

```
not Mr. Chen is an appropriate custodian be deemed as a ruling
 1
   as to whether or not he may be deposed in the case.
 3
             So that's the Court's ruling as to Mr. Chen. I'm
 4
    going to approve Exhibit B with the removal of his name from
 5
    the list.
 6
             MR. SLATER: Your Honor, we need to substitute
 7
    somebody for him.
 8
             THE COURT: Do you have a name?
 9
             MR. SLATER: I would need a couple hours or an hour
    or two just so I can talk to somebody, to some people, and
10
    just figure out who to substitute.
11
             THE COURT: Okay. Could you e-mail me that name,
12
13
   Mr. Slater, and I'll add it to Exhibit B, so I can enter this
14
   order?
15
             MR. SLATER: Of course.
16
             THE COURT: Thank you.
17
             All right. Is the only issue left the issues
    regarding the document requests?
18
19
             MR. SLATER: Your Honor --
             MR. RUBENSTEIN: Your Honor, very quickly, this is --
20
           This is Brian Rubenstein for the Teva defendants.
21
22
             There is no objections with respect to Exhibit D, the
    list of Teva custodians, but there were just a few names that
23
   were misspelled, so we can submit a revised list with the
24
25
   proper spellings of those few names.
```

```
THE COURT: Okay. Would you be kind enough to e-mail
 1
 2
    that to me so that I can enter this before the holiday? Or
 3
    fax it?
             MR. RUBENSTEIN: Yes.
 4
 5
             THE COURT: You could e-mail it or fax it?
             MR. RUBENSTEIN: Yeah, e-mail. E-mail would be
 6
 7
    easier.
             That's no problem.
 8
             THE COURT: Thank you, counsel.
 9
             MR. RUBENSTEIN:
                              Yep.
10
             THE COURT: With regard to the requests for
    documents, should the Court be looking at Exhibit A-1?
11
12
             MR. SLATER: Whatever is easier for your Honor to
13
   read.
             And before you even start, we can tell you there was
14
15
    a couple other things that happened after we sent it in to
    clarify a couple of the issues, so there is a couple of things
16
17
    that will get us closer to the finish line.
             THE COURT: Okay. Let's deal with the issues, and
18
19
    you can send me a clean version so I could get it entered.
20
             So I have the letter. I'm on Page 2 of the letter.
    Should we start with Number 19?
21
22
             MR. SLATER: Sure.
23
             THE COURT: Okay. What's the dispute?
24
             MR. SLATER: The defendants have asked to take out
25
   the word "all." It's obviously a significant term in the
```

```
request, and it was not objected to, so we believe it should
 1
 2
   be left as it is. To leave it as produce documents with
    regard to the manufacturing process could mean produce a
    couple of documents. We want all the documents that come
 4
 5
   within the scope of what was heavily and detail argued last
    week, and there was no objection to the word "all" last week
 7
   because it was recognized as necessary.
 8
             THE COURT: Do you want to be heard, Mr. Goldberg?
 9
             MR. GOLDBERG: I mean, you know, your Honor, I'm just
    looking at the transcript from the hearing we had, where we
10
    talked about Request 19, and Page 23 of that transcript starts
11
    with me saying for Number 19, "We will produce documents
12
13
    regarding," and then there is a whole list of documents.
    They're going to get these documents.
14
15
             I think when you use the term "all documents
    regarding," that kind of breadth is exactly what we've been
16
17
   meeting and conferring about for three months. Of course,
    they're going to get the documents, and they're all listed
18
19
    there.
             THE COURT: The word "all," the Court rules the word
20
    "all" stays in. Mr. Goldberg's concern is dealt with because
21
22
    the request specifically refers to the documents on the
    December 11 transcript, so I think the concern of the
23
24
    defendants is taken care of.
             Number 20?
25
```

```
1
             MR. SLATER: The same issue, your Honor.
 2
             THE COURT:
                        Stays in.
 3
             Number 21?
 4
             MR. SLATER: This issue was -- and it might be
 5
   helpful just because the red line may cross out the language
    and be hard to read, but if you recall at the hearing,
 7
   Mr. Trischler asked us to put in the specific language from
 8
    the macro order by your Honor on this testing question to
 9
   provide more specifics on the scope of what needed to be
   produced, and so we put that language in there. So we thought
10
    that we were complying with the request, which made some
11
    sense, because it gives more meat to what the request is
12
13
    getting at, and so we're unsure as to why now the position is
    that language should not be there, when we were asked to
14
15
    include it and agreed to at the hearing.
16
             THE COURT: Which is the language that's the subject
17
    of the dispute?
18
             MR. SLATER: It's -- you can see a lot of it is
    crossed out, but after the word "Docket 303" in the third
19
20
    line --
             THE COURT: Yes.
21
22
             MR. SLATER: -- and I'm reading from the clean
23
   version, it says: As stated in the Court's November 25, 2019,
24
    order, this includes tests showing unknown and unidentified
25
   testing peaks or general toxic impurities in valsartan API or
```

```
valsartan, any tests that could identify the presence of
 1
 2
   nitrosamine contamination, and testing and results regarding
    other carcinogens, general toxic impurities, or residual
    solvents in the valsartan API and valsartan. That is --
 5
             THE COURT: Okay.
 6
             MR. SLATER: That is the language that they're
 7
    objecting to.
 8
             THE COURT: Anyone want to speak to that for the
   defendants?
 9
             MR. GOLDBERG: Your Honor, I think -- I think we've
10
    already struck it, or primarily struck it, simply because it's
11
    duplicative of the first sentence, which expressly
12
13
    incorporates Paragraph 8.
14
             THE COURT: The Court's ruling is --
15
             MR. GOLDBERG: It --
16
             THE COURT: I'm sorry.
17
             The Court's ruling is that the language stays in.
                                                                 Ιt
    simply quotes the Court's transcript. There is no debate
18
19
    about it. It doesn't hurt anyone. So it stays in.
20
             Number 44.
             MR. GOLDBERG: Your Honor, before you move on, there
21
    is another edit to this paragraph.
22
23
             THE COURT: Okay.
24
             MR. GOLDBERG: It says -- in the last sentence, it
25
    says: As ordered during the December 11th court hearing, the
```

relevant time period for ZHP's production of the testing 1 2 listed in plaintiffs' December 10, 2019, letter shall date back to the start of the implementation of the manufacturing process in 2007 for ZHP and to the date on which the manufacturing process was first implemented for other API manufacturers. 7 I don't think the last part was ruled on. I don't 8 know that the Court made that ruling, that testing would go back to the date first implemented for other API manufacturers. And with respect to ZHP, I think the 10 discussion in court was about chromatograms and chromatography 11 because that is the kind of testing that the parties have 12 13 agreed can be used to identify impurities. THE COURT: Let me just talk to that last issue you 14 It was not the Court's intent to limit the responsive 15 testing to just that one test, Mr. Goldberg. I don't know, 16 17 I'm not an expert on tests, but if there is unknown testing peaks or general toxic impurities in a valsartan test besides 18 19 chromatograph, it's responsive. So the last part of your 20 statement I'm very confident we dealt with, and it's not so limited. 21 22 I agree with you that we did not specifically discuss whether this particular request should go back to the start of 23 24 the manufacturing process for other defendants. I agree with

you, we only discussed it in the context of ZHP, but if I

```
recall, I could be wrong about this, when we went over the
 1
 2
    relevant times, it was so close, that's my recollection of it.
 3
             Mr. Slater, what do you have to say about this?
             MR. SLATER: It was my understanding -- we obviously
 4
    arqued this in the context of ZHP because that was -- that was
 5
    the defendant that we went back and forth with, and we were
 6
 7
    able to establish the list in the December 10 letter. But my
 8
    understanding was that the same reasoning should hold true for
 9
    the other manufacturers because we need to see what their
    testing showed over the course of time, so the same rationale
10
    would apply to the other API manufacturers as well.
11
12
             MR. GOLDBERG: Your Honor, this is Seth Goldberg.
13
             I'm going to defer to the other manufacturers, but I
    will say that the rationale for ZHP was something very
14
    specific. Plaintiffs argued that there was one process
15
   before -- in 2007, that that process underwent a change in the
16
17
    2011 through '13 time frame, and that what they wanted to be
    able to demonstrate with respect to ZHP was what happened with
18
19
    respect to the change in process. That was a very specific
20
    issue, and did not -- at no point during that discussion was a
    similar process discussed with respect to the other
21
22
   manufacturers or the need for their relevant time period to be
    enlarged. But I'm just reminding the Court of the rationale
23
24
    as to ZHP and will defer to my colleagues.
25
             THE COURT: Here is the Court's ruling on this issue.
```

```
We identified the relevant time periods. It's in the Court
 1
 2
    order. The Court order said for good cause, we can go back
 3
    further. This particular request, if it's not the most
    important document request in this set, is certainly in the
 5
    top two or three. So the Court rules that it's appropriate to
    go back to the start of the manufacturing process for each of
 7
    the API manufacturers, even if -- and I don't know if it's the
 8
    case -- even if plaintiff cannot establish in the first
 9
    instance that there was a manufacturing change. That should
    not be a prerequisite to the requirement to produce testing
10
    results that may put the defendants on notice of a problem
11
12
    with valsartan. So the language in 21 stays.
13
             44?
14
             MR. GOLDBERG: Your Honor, this is Seth Goldberg.
15
             We proposed having this be qualified by Paragraph 8
    of the Court's macro discovery order, and we proposed
16
17
    including language to make that explicit.
             MR. SLATER: That's fine, your Honor. We'll agree to
18
19
    that.
20
             THE COURT: Okay. The addition stays.
             Next is 52 to 65.
21
22
             MR. SLATER: All we did in our letter, your Honor, is
    just qualify. It's our understanding that the qualification
23
24
    added by defense counsel was intended to reference the Court's
25
   macro discovery decision on the scope of foreign regulatory
```

```
discovery. If that's the intent, then we have no objection.
 1
 2
             MR. GOLDBERG: That limitation or that -- you have
 3
    that correct, Mr. Slater, but, also, the Court's order with
    respect to health effect issues.
 4
             MR. SLATER: That would obviously apply, so, you
 5
    know, anything that defense counsel or the defendants would
 6
 7
   produce, obviously, is subject to the Court's order, so there
 8
   would be no basis for us to object to that. I think it's
 9
    already implicit. So, if that's the qualification, then we
10
    can accept that.
             THE COURT: Okay. 110 to 111.
11
12
             MR. SLATER: Your Honor, I'm going to hand this off,
13
   but I just wanted to let the Court know there has been some
   more discussion between the parties, so I think that there is
14
    going to have to be some more modification, but I'm going to
15
   hand off to Ms. Whiteley now to explain what -- because I know
16
17
    there's been meet and confers going on through this morning
    just before the call.
18
             MS. WHITELEY: Your Honor, this is Conlee Whiteley,
19
    and I'm not sure if Mr. Trischler is still on the line,
20
   because I know he had several commitments this morning, but he
21
22
    and I spoke this morning, and we agreed to eliminate all of
    the strike through in exchange for a certain qualification
23
24
    added to Number 107 to reflect the entirety of the Court's
25
   rulings.
```

```
1
             THE COURT:
                        If it's okay with you, Ms. Whiteley, it's
 2
    okay with the Court. If it's okay with you and Mr. Trischler,
    it's okay with the Court. That's what I meant to say.
 4
             MS. WHITELEY: I understand. Thank you.
             MR. STOY: Your Honor, this is Frank Stoy for Mylan.
 5
   Mr. Trischler did have to drop off the call. But what
 7
   Ms. Whiteley represented is consistent with the conversations
 8
    that she and Mr. Trischler had this morning, with the one
 9
    caveat that I'm not sure the other manufacturing defendants
   have had the opportunity to chime in, but we don't anticipate
10
    that there will be any issues.
11
12
             THE COURT: And, last but not least, Number 118.
13
             MR. SLATER: We are agreeing to remove that, your
            There were discussions that were going on that I was
14
15
    not aware of at the time we submitted this, where it was
    agreed by a number of our Executive Committee to remove that
16
17
    request, so we'll remove it.
18
             But there is one we skipped, which is 100, also.
19
             THE COURT: Oh, 100. I'm sorry.
20
             MR. GOLDBERG: Number 100 we skipped over.
21
             THE COURT: Yes, I did skip 100. Excuse me.
                                                           Let me
22
    get to it.
23
                    What is the issue with 100?
             Okay.
24
             MR. GOLDBERG: Your Honor, we --
25
             MR. SLATER: I apologize. Go ahead.
```

MR. GOLDBERG: I think we had proposed revising this,
just to make it read consistent with the Court's -- or the
discussion on -- at the hearing, to have it be limited to just
say acting as a class representative, and to remove the
specific references to MS- -- to MSP Recovery Services and
assignors and the specific names with these.
         At the hearing we discussed that it's just the named
class representatives in the three master complaints, and we
think having the additional names is not necessary.
         THE COURT: The names that you want to strike, are
they class reps?
         MR. GOLDBERG: Well, I don't believe the assignors
are, and --
         THE COURT: Okay.
         MR. GOLDBERG: I don't know for sure if these
entities are, but I think by just saying class
representatives, we limit it to the right universe.
         THE COURT: That's hard to argue with -- right.
Mr. Slater, that's hard to argue with. What do you think?
         MR. SLATER: Well, these are entities, the assignors
and the other entities that are named, they're specific,
they're insurers, and if they've had communications directly
with the defendants that are named in this, those would be
important.
         The MSP itself would likely not have those -- any
```

```
extensive communications or it would not have the entirety of
 1
 2
    communications, I should say. It is likely or a potential
 3
    that there will be other communications, and they would be
    with these other entities, and the case is going to be proven
 5
    through documents and information from these other entities,
    on whose behalf MSP has brought this litigation. So it's very
 7
    important, and it helps to build the case on behalf of MSP.
 8
    There is no other way to capture it. If this comes out, then
 9
    relevant communications will be lost from us.
             MR. GOLDBERG: Your Honor, I think the issue here is
10
   we don't -- we don't know who the assignors are. I don't know
11
    that we have -- if plaintiffs are not willing to provide a
12
13
    list or identify them, how can we know? And so why -- this
   puts a burden on us to do something that we don't know we can
14
15
    do.
16
             THE COURT: Let me chime in here, Mr. Goldberg.
17
             MR. GOLDBERG: Yeah.
             THE COURT: We'll limit the request to just the named
18
19
    class reps. My recollection is that there was a significant
20
    number of assignors. If plaintiffs need the communication,
    it's their client. They should ask their client for it. So
21
22
    we will just limit it to the class reps.
23
             MR. SLATER: Understood. We will modify that, your
24
   Honor.
25
             THE COURT: Any other issues?
```

```
MR. SLATER: None for plaintiffs.
 1
 2
             THE COURT: So where we're left with, the Court is
 3
    going to get a revised copy of the document requests, and
 4
    we're going to get the one additional name of the ZHP
 5
    custodian, and we're going to get a revised list to correct
    the typos, I think, from Mylan. And then after that, I'll
 7
    enter the order approving these exhibits.
 8
             I can't commend the parties enough for all the work
 9
    they did. My goal was to get this done before Christmas so
    that at least I wouldn't feel guilty requiring the parties to
10
    work over Christmas vacation.
11
12
             If we're going to talk this afternoon on that
13
    non-manufacturing defendant issue, we'll deal with it.
   Everyone's going to be treated fairly, Mr. Slater. You don't
14
    have to be worried about that. But I want to do whatever I
15
    can to avoid at least this Court requiring anyone to work over
16
17
    the holiday. So I'm glad we put in the extra effort to get
    this done before the holiday, and, hopefully, the people who
18
   have been working so hard on this can relax a little bit and
19
20
    get back to the grindstone after the new year.
             So I'll get those exhibits, I'll enter the order.
21
22
    For the good of the order, anything else we need to discuss on
    this call?
23
24
             MR. SLATER: Nothing for plaintiffs.
25
             Thank you very much for your hard work on this, too,
```

```
your Honor. We appreciate it.
 1
 2
             MR. GOLDBERG: Your Honor, I think there is just one
 3
    thing we would like to clarify.
             Your Honor had previously had defendants producing
 4
 5
    documents produced to or shown to the FDA during inspections
    and EIRs, 483s, et cetera, for finished dose facilities in
 7
    December -- on December 31st. At the hearing last week, we
 8
    discussed moving that to January 31st. I think your Honor
 9
   made that order or suggested he was going to make that order,
    and I don't think we got that clarity.
10
             THE COURT: Okay.
11
12
             MR. GOLDBERG: So we would just like to have that
13
    formally extended to January 31st.
             THE COURT: Mr. Goldberg, if I didn't do that, it was
14
    an oversight. Refresh my recollection about what order we're
15
16
    talking about.
17
             MR. GOLDBERG: So Docket 303 at Page 2 requires the
    production of documents produced to or shown to the FDA during
18
    inspections of the manufacturing facilities.
19
             THE COURT: All right. That's good enough for me.
20
21
    I'll take care of it, Mr. Goldberg.
22
             MR. GOLDBERG: Okay.
23
             THE COURT: I'll enter a new order. We'll extend
24
    that date from December 31st to January 31st. If it wasn't
25
   done, it was an oversight. I'll take care of it.
```

```
1
             MR. GOLDBERG: Thank you, your Honor.
 2
             THE COURT: If I don't speak with everyone, I hope
 3
    you have a great holiday. Again, thank you for all your hard
 4
    work and we're adjourned.
 5
             MR. SLATER: Thank you, your Honor.
 6
             MR. GOLDBERG: Thank you, your Honor.
 7
             MS. WHITELEY: Thank you, your Honor.
 8
             (The proceedings concluded at 12:07 p.m.)
 9
10
11
             I certify that the foregoing is a correct transcript
12
    from the record of proceedings in the above-entitled matter.
